

# Coherent Web Phase II Advisory Group Descriptions

September 28, 2011

Ver. 1b

# Wiki Advisory Group - Overview

Established: TBD

Phase II of the Coherent Web project includes the development of a built-in wiki for the website. The wiki will be utilized by ESDIS users and can be additionally extended to other groups (e.g. USWG) as needed. The current plan has been to examine the existing wiki for ESDIS and build a new one in Drupal with similar needs. But more user feedback is desired and necessary.

The current members of the Wiki Advisory Group include:

**ESDIS:** Kevin Murphy, Ed Sofinowski, Carol Boquist (also Outreach/USWG)

**CW Team:** Michelle White, Greg Baerg (Facilitator)

**Outreach:** Jennifer Brennan, Geralyn Tourant, Dave Bruton

**ESDSWG:** Steve Olding, Ross Bagwell

# “For Developers” Advisory Group - Overview

Established: TBD

Per Chris Lynnes, the genesis of this group is the following: There should be a "For Developers" page where we could put links to OSDD's with a little context about what they are good for and how to use them, as well as pointers to the ESIP conventions governing them. Not to mention our other APIs, like the one Tim Goff is creating.

The current members of the “For Developers” Group include:

**ESDIS:** Kevin Murphy (facilitator), Andy Mitchell

**LANCE:** Steve Kreisler

**CW Team:** Michelle White, Matt Cechini, Greg Baerg,

**GSFC:** Chris Lynnes

# EOSDIS Watch Advisory Group - Overview

Established: TBD

In the first phase of the CW Project a “ticker” of metrics about EOSDIS was included on the front page. This section can be improved to provide more directed information and can link to pages that include more graphical representations of EOSDIS’s reach with data. This group will help define what should be presented in the box and what it should link to (with the assumption that it can be updated automatically or with minimal support).

The current members of the EOSDIS Watch Advisory Group include:

**EOSDIS:** Kevin Murphy (facilitator), Ed Sofinowski, Lalit Wanchoo, H. K. "Rama" Ramapriyan

**CW Team:** Michelle White, Greg Baerg

# NASA DAACs Advisory Group - Overview

Established: TBD

Part of the initial deliverable for the Earth Data website was to integrate a number of existing websites, including the Featured Research found at NASA DAACs (<http://nasadaacs.eos.nasa.gov/>). While most content has actually been moved, there is a desire to change the look/layout of the feature area before completing the integration.

The current members of the NASA DAACs Group include:

**ESDIS:** Kevin Murphy, Carol Boquist (also Outreach, USWG)

**CW Team:** Michelle White, Greg Baerg (facilitator)

**NSIDC/NASA DAACs:** Jane Beitler, Laura Naranjo

**Outreach:** Jennifer Brennan

# Calendar Advisory Group - Overview

Established: TBD

Phase II of the Coherent Web project includes the development of a event calendar for the website. The functionality of the calendar is straightforward (at this point), with the ability for different views to an internal/external audience. The calendar can display a variety of types of events, including conferences, program milestones, internal notifications (outages/service/deadlines) and even absences of key personnel. The purpose of the group is to determine other requirements.

The current members of the Calendar Advisory Group include:

**ESDIS:** Kevin Murphy, Dave Burton

**CW Team:** Michelle White (facilitator), Matt Cechini, Greg Baerg,

**Outreach:** Geralyn Touart

**ESDSWG:** Steve Olding
